SEE REVERSE SIDE

Common renovation activities like sanding, cutting and demolition can create hazardous lead dust and chips by disturbing lead-based paint in pre-1978 construction, which can be harmful to adults and children. To protect against this risk, EPA issued this new rule on April 22, 2008, which requires the use of lead-safe work practices and other actions aimed at preventing lead poisoning. **I understand that I must comply with ENVIRONMENTAL PROTECTION AGENCY 40 CFR PART 745 { EPA-HQ-OPPT-2005-0049; FRL-8355-7} RIN 2070-AC83 Lead, Renovation, Repair and Painting Program, on all pre-1978 residential construction.**

This permit is subject to any easements of record and in no way supersedes any such restrictions. It is the property owner's responsibility to determine if there are any easements and/or restrictions on the use of his or her property. Approval of a building permit does not ensure that the proposed work does not violate an easement unless expressly noted on the permit.
